The screenshot displays the Camunda BPMN Designer interface. The main workspace shows a DMN Business Knowledge Model titled "DMN Business Knowledge Model with input data". The diagram consists of a "DISH" input element, a "Decision" element, and a "Simulation of DMN using Decision" output element. Below the diagram is a table for "Input Parameter Values for Simulation".

U	Input 1	Input 2	Output 1
1	Fall	==5	Steak
2	Winter	==5	Roastbeef
3	Spring, Summer	==4	Dry Aged Gourmet Steak
4	Spring	[5..4]	Steak
5	Fall, Winter, Spring	>8	Steak
6	Summer	-	Light Salad and a nice Steak

Overlaid on the interface is a "Food Selector" application window. It features a "Season" dropdown menu set to "Summer", a "Result" field displaying "Light Salad and a nice Steak", and a "Plan Meal" button. Below the text is an image of a plate of food.

The Properties panel on the right shows details for the selected DMN element, including its name, type, author, version, and appearance settings.
